Title Index

- Clay, strength of, subjected to cyclic loading, 165
- Continental shelf marine geotechnics, distribution of soils, measurement of properties, environmental hazards, 33
- Deep sea sediments, geotechnical properties of, Bermuda Rise, 195
- Electrical resistivity, method for evaluating in-situ porosity of clean marine sands, 91
- Extra high voltage offshore transmission lines, influence of soils on, 141
- Haamer Vibrocorer, its affect on geotechnical properties of cohesive sediments, Gothenburg Harbor, Sweden, 233
- Impact penetrometer, use for the evaluation of in-situ strength of marine sediments, 73
- Lateral movements of objects, resistance to on ocean floor, 187
- Marine sediments, permeability of unconsolidated and consolidated, Gulf of Mexico, 1
- Mississippi Delta sediment pore water pressure experiment, initial results and progress of, 327
- Nuclear waste, feasibility of subseafloor emplacement, 267
- Ocean wave loading problems, cyclic testing of soil for, 305
- Offshore caisson structures, very weak soils, 295
- Pore pressure, excess, Mississippi Delta front sediments, initial report, 337
- San Diego Trough, geotechnical test area, 345
- Soil exploration, 500 m deep fjord, Western Norway, 117
- Submersible cone-penetrometer rig, *Seacalf*, 15

1. The first thing I noticed when I stepped out of the car was the smell of fresh air. It was a relief after being stuck in traffic for hours. I took a deep breath and felt a sense of freedom. The sun was shining brightly, and the birds were singing. It was a beautiful day, and I was finally out there.

2. I walked towards the park, feeling a sense of purpose. I had been thinking about this for a long time, and now it was here. I could feel the grass under my feet, and the breeze on my face. It was a moment of pure joy, and I knew I was exactly where I needed to be.

3. As I walked, I noticed a small stream flowing through the park. The water was clear and cool, and it sounded like a gentle whisper. I stopped for a moment to look at it, and I felt a sense of peace. It was a small stream, but it was a reminder of the beauty of nature.

4. I continued my walk, and I noticed a small path leading through the trees. I followed it, and I found a small clearing. There was a small table and some chairs, and it looked like a perfect place to sit and relax. I took a seat, and I felt a sense of calm.

5. I sat there for a while, and I noticed a small butterfly flying around me. It was a beautiful sight, and I felt a sense of wonder. I watched it for a moment, and then it flew away. I felt a sense of loss, but I knew it was just a butterfly.

6. I stood up and walked towards the stream. I noticed a small fish jumping out of the water. It was a beautiful sight, and I felt a sense of awe. I watched it for a moment, and then it went back into the water. I felt a sense of peace.

7. I walked back to the car, and I noticed a small package in the back seat. I opened it, and I found a small box. It was a gift, and I felt a sense of joy. I opened the box, and I found a small book. It was a beautiful book, and I felt a sense of wonder.

8. I took the book and walked back to the stream. I sat down, and I opened the book. It was a beautiful book, and I felt a sense of peace. I read it for a while, and I felt a sense of joy. It was a perfect day, and I was finally out there.

9. I closed the book and looked at the stream. I noticed a small fish jumping out of the water. It was a beautiful sight, and I felt a sense of awe. I watched it for a moment, and then it went back into the water. I felt a sense of peace.

10. I walked back to the car, and I noticed a small package in the back seat. I opened it, and I found a small box. It was a gift, and I felt a sense of joy. I opened the box, and I found a small book. It was a beautiful book, and I felt a sense of wonder.
